

Project Design Phase-I

Solution Architecture

Date	26 October 2022
Team ID	PNT2022TMID12156
Project Name	Project -PERSONAL ASSISTANCE FOR SENIORS WHO ARE SELF-RELIANT
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Medicine Reminders serve as good way to stay on track and uphold appropriate schedule.
- It helps in decreasing medication dispensing errors and wrong dosages.
- It is used to organize your medication doses for a certain length of time.
